### ***Allowable Subject Matter***

1. Claims 1-40 are allowed.
2. The following is an examiner's statement of reasons for allowance: None of the prior art teaches a method for generating a projection of a received signal that includes, determining a basis matrix composed of basis vectors, storing elements of said basis matrix, generating a diagonal matrix from the stored elements of the basis matrix, generating one or more scalars from the diagonal matrix and from the basis vectors of the basis matrix and applying one or more scalars to the received signal to project the signal of the source of interest, as shown in claims 1 and 32, 35 and 38-40. None of the prior art teaches a method for generating a projection of a received signal that includes, forming an orthogonal basis matrix of the matrix of the source of interest, generating a diagonal matrix from values stored while forming the orthogonal basis matrix, generating one or more scalars from the diagonal matrix and the basis vectors of the

orthogonal basis matrix and applying the one or more scalars to the received signal, as shown in claims 10, 21, 33 and 34.
